DIRECTORY INFORMATION

To The Patient:

As a patient at Johnson County Hospital, we strive to maintain your privacy and security. A hospital directory is a listing maintained in our Admission Office and respective nurses stations of all the patients at Johnson County Hospital for purpose of visitors or callers that wish to contact you while you are here. This information stays within the facility, there is no distribution to other media, unless you have signed the authorization for news/media release and this information would include your name and date of admission and/or discharge. Only authorized personnel may release information to visitors/callers.

Johnson County Hospital employees will only release your location in the facility and your general condition if the request is by patient name. We offer our patients the opportunity to “opt-out” or be omitted from the Johnson County Hospital directory.

We also maintain a listing of patients for the clergy for all religious preferences. All clergy have access to your name and location, and may request your general condition. You may also “opt-out” of the clergy listing.

If you would like to be omitted from either of these listings, please notify the staff.
